

# Thermo Fisher Scientific, Inc.

One Lambda, a Thermo Fisher Scientific brand contracted Hereva to provide Project Management services for its “One Roof” project. The 120,000 sf project allowed the consolidation of three buildings from an existing campus into one state-of-the-art GxP facility that houses office, R&D, manufacturing, warehousing and back of house functions.

The project required careful coordination of the relocation of existing equipment with the integration of new equipment. Phased relocations of the equipment commenced in Q4 of 2017, creating a critical path, as production had to be maintained during the transition.

In addition, Hereva assisted with the coordination of supply chain requirements into the project including warehousing, cold storage, raw material and finished product. Hereva drove implementation of all operational requirements for relocating the existing campus to the One-Roof building and maintaining communications with all project stake holders.

Hereva was on board with Thermo Fisher through operational start-up. The project completed Q3 of 2019.

## ABOUT THE CLIENT

Thermo Fisher Scientific Inc. is the world leader in serving science, with revenues of \$18 billion and more than 55,000 employees globally. Their mission is to enable our customers to make the world healthier, cleaner and safer. They help their customers accelerate life sciences research, solve complex analytical challenges, improve patient diagnostics and increase laboratory productivity. Through premier brands – Thermo Scientific, Applied Biosystems, Invitrogen, Fisher Scientific and Unity Lab Services – they offer an unmatched combination of innovative technologies, purchasing convenience and comprehensive support.
